

I am a truck driver and I suport xm radio/weather and road conditions. The regular radio stations do not give regular road conditions (if you can find the station and time for each city). Also it is a lt more dangerous to be hunting for each station when I am in the town and fif I do find a station it is usually to late t change my rout to miss the bad weather/traffic conditions. I feel since I am paying for this service the regular radio should not have any say in what station I listen to. thank you Kerry Andrews
